DATE: November 4, 2013

SUBJECT: Route I-70, City of St. Louis
Job No. J6I2413
St. Louis City Water Division
Pre-Negotiation Review

I have reviewed the cost estimate in the amount of **\$235,714.77** from the St. Louis City Water Division for the above-mentioned project for water line relocations. Commission obligation on this project is 100 percent.

The labor and material costs included in the estimate are comparable to those noted in similar estimates.

City Water has provided documentation of the calculation of the 45% handling charge. This documentation sufficiently verifies that only allowable expenses were included and the appropriate base (i.e., all material issued or purchased) was used in the calculation.

An actual cost agreement is acceptable.

Please contact me with any questions!

Sally
