Dear

Your project performance evaluation for Contract , Route , County is enclosed.

Please review the evaluation carefully and contact me by if you find any responses that are in error. You may contact me at . I am available to discuss with you the responses of your project evaluation or any concerns you may have regarding the performance rating. Once all project reviews are completed, contractor performance summaries for all work active in will be forwarded to you.

Please carefully note the portions of 7 CSR 10 printed below. We do not want you to miss your opportunity to contest the evaluation of the performance summary results due to expiration of the time limits cited in the statute.

7 CSR 10-10.050 "The contractor's representative, as his/her election, may meet privately with the resident engineer to review the contractor performance project evaluation. If the contractor's representative does not review the project evaluation, he/she shall sign and date it as an acknowledgment that he/she has reviewed it. If the contractor's representative does not return a signed project evaluation to the resident engineer within three (3) weeks after it has been mailed to him/her, the project evaluation shall be final, with no further comment to be considered by the contractor's representative."

7 CSR 10-10.00 "If the contractor disagrees with any performance measure finding on the contractor performance evaluation and cannot resolve the dispute with the resident engineer, it may request in writing that the district engineer review the matter. Such request must be made to the district engineer within twenty-eight (28) days from the date of the mailing of the project evaluation to the contractor. However, the contractor's representative shall first have discussed the project evaluation response with the resident engineer in order to resolve the dispute. Upon receiving the contractor's written request to review the disputed performance measure finding on the project evaluation, the district engineer shall review the matter and provide the contractor with a written response regarding the particular area of dispute between the contractor and the resident engineer."

The contractor rating system is a joint effort between MoDOT and contractor representatives. With the assistance of the contracting industry, the system is evolving to evaluate contractor operations in a fair, objective, and consistent manner. The summaries will be provided to contractors to allow them the opportunity to evaluate and improve their operations, which in turn provide the public with quality and timely projects.

Thank you,

Resident Engineer
