616.8.46S (TA-46S) Stationary Work in the Vicinity of a Railroad Grade Crossing

- Always contact the railroad company or light transit agency before work starts.
- Do not allow equipment or vehicles in the active work zone to stop within the grade crossing.
- Always use advance warning signs:
  2. Do not exceed one mile between flagger and FLAGGER symbol sign.
  3. Channelizers may be reduced or eliminated.
- Always use a protective vehicle. If available, use a truck/trailer mounted attenuator (TMA).
  1. Activate high intensity rotating, flashing, oscillating, or strobe lights.
  2. Position the protective vehicle/TMA a minimum of 150 feet in advance of the work space, if possible.
  3. If used, operate the flashing arrow panel in the four-corner or alternating diamond caution mode.
- Consider using a pilot vehicle for lengthy or difficult work zones to navigate.
- Flagger Station:
  1. Flaggers will maintain a minimum of 100 feet from any equipment or workers.
  2. Use the 3-2-1 cone procedure.
  3. Identify an escape route for all flaggers.
  4. Illuminate flagger stations at night, except in emergencies.
- Notes:
  1. Flaggers and pilot vehicle operators are required to have current flagger certification training.
     a. External flagger training will meet standard specifications located in section 616.4.3.
     b. Internal flaggers will be trained in accordance with EPG 616.5.1.
  2. Supporting Figure: Side Roads Entering Work Zones.
  3. One or both lanes of traffic may be stopped at the same time for up to a maximum of 15 minutes.

For other operations, refer to:

- **Mobile:**
  1. EPG 616.8.17M (TA-17M) Mobile Operation on a Two-Lane Highway.

- **Short Duration (60 minutes or less):**
  1. EPG 616.8.10SD (TA-10SD) Short Duration Lane Closure on a Two-Lane Highway using Flaggers.
  2. EPG 616.8.10TMASD (TA-10TMASD) Short Duration Lane Closure on a Two-Lane Highway using TMA Flaggers.
