

Wood Post Selection Table

Sign Size sqft	Wood	
	4 x 4	4 x 6
≤ 10	1	
> 10 and ≤ 16	2	1
> 16 and ≤ 30		2

Notes:

- Signs wider than 4 feet, except diamond warning signs, require 2 posts.
- Signs shall always be mounted on the 4-inch face of a 4 x 6 wood post.
- When 4 x 6 post are used they must be cross drilled per figure to the right
- See Standard Plans 903.03 for post installation details

Use of table

- Determine Sign Height and Width
- Calculate Sign Area = Sign Height X Sign Width
- Identify the correct row under the Sign Size sqft column the calculated Sign Area falls within
- Identify the available post options in that row
- Signs wider than 4 feet, except diamond warning signs, cannot be installed on one post, in these cases choose the two post option
